A GIS-BASED MANAGEMENT SYSTEM FOR UNDERGROUND MINING SAFETY: A PRACTICAL APPROACH

LAP LAMBERT Academic Publishing, 2010. Taschenbuch. Condition: Neu. Neu Neuware; original eingeschweisst; Rechnung mit MwSt.; new item, still sealed. - Mine safety is of paramount concern to the mining industry. In this sense the generation of a Geographic Information System (GIS) which can administrate relevant spatial data efficiently is a very vital issue for underground mining safety. In an effort to achieve a balance of safety and productivity, GIS can contribute to the creation of a safe working environment in...

Reviews

Very helpful to all of class of folks. This is certainly for all who state there had not been a worthy of studying. Once you begin to read the book, it is extremely difficult to leave it before concluding.  
-- Jayda Lehner Jr.

It is a of the most popular publication. It really is filled with knowledge and wisdom. It's been designed in an exceedingly straightforward way and it is merely soon after i finished reading this pdf by which actually transformed me, affect the way in my opinion.  
-- Gerardo Rath

Extremely helpful for all class of folks. I really could comprehend almost everything using this written e publication. You will not feel monotony at any time of the time (that's what catalogs are for about in the event you check with me).  
-- Prof. Melyna Dooley V
